## Accessing DynamoDB from Java programs

1. Create a simple maven project (i.e. skip archetype selection).

2. Put following dependencies in `pom.xml`

```xml
<dependencies>
    <dependency>
        <groupId>com.amazonaws</groupId>
        <artifactId>aws-java-sdk-dynamodb</artifactId>
        <version>1.11.949</version>
    </dependency>
</dependencies>
```

3. Try executing Java Class [CatalogMain.java] depends upon [CatalogItem.java]
